Product fiche pursuant to Delegated Regulation (EU) no. 392/2012

| Model DCX83120W Rated capacity in kg of cotton laundry for the standard cotton programme at full load 8 Air vented, condenser or gas fired Condenser Energy efficiency class 8 Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" KWh gar yar, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" N/A Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" KWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" N/A Automatic Eu Ecolabel (If applicable) - - Energy consumption of the standard cotton programme at full and partial load, and the consumption of the law-power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic Eu Ecolabel (If applicable) - - Energy consumption of the standard cotton programme at full and partial load of the applicable? 0.5 W / 1.0 W The duration of the left-on mode if the appliance is equipped with a power management system 30 minutes Indication that the "standard cotton programme" used at full and partial load is the standard dotton programme is usuable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton 100 mins (T | Tumble Dryers | Answer |
|---|---|---|
| Rated capacity in kg of cotton laundry for the standard cotton programme at full load 8 Air vented, condenser or gas fired Condenser Energy efficiency class 8 Electric Only: The weighted Annual Energy Consumption "Energy consumption "X" KWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption "X" KWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" N/A Automatic tumble dryer or Non automatic tumble dryer Automatic Automatic EU Ecolabel (If applicable) - - Energy consumption of the standard cotton programme at full and partial load, and the consumption of the appliance is equipped with a power management standard drying programme to which the information within the label & fiche relates, the standard cotton programme" used at full and partial load is the standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, the standard drying programme" used at full and partial load is the standard drying programme is suitable for drying normal wee cotton and that it is the standard drying programme is suitable for drying normal wee cotton programme at full and partial load is the standard cotton programme at full and partial load is the standard drying programme is suitable for drying normal wee to the nearest minute as well as the programme time of the label fiche relates, that it is the most efficient programme in terms of energy consumption for cotton S7 | Supplier's Name or Trade Mark | Beko |
| Air vented, condenser or gas fired Condenser Energy efficiency class B Electric Only: The weighted Annual Energy Consumption -"Energy consumption "X" kWh SGI kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" N/A Gas Only: The weighted Annual Energy Consumption -"Energy consumption "X" kWh N/A Gas prive, the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used" N/A Automatic tumble dryer or Non automatic tumble dryer Automatic EU Ecolabel (If applicable) - Energy consumption of the standard cotton programme at full and partial load O.S W / 1.0 W Order or the low-power works. Actual energy consumption gramme is ustable for drying norgariame. 30 minutes The duration of the left-on mode (P 0) and on the left-on mode (P 1) for the standard cotton programme? 30 minutes Indication that the "standard cotton programme" used at full and partial load is the standard drying norgariame is suitable for drying norgariame. * Indication that the "standard cotton programme" used at full and partial load is the standard drying norgariame is suitable for drying norgariame. * Indication that the "standard cotton programme" used at full and partial load is the standard cotton programme in terms of energy consumption for cotton * | Model | DCX83120W |
| Energy efficiency class B Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" KWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" KWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load The duration of the left-on mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme is terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at sull load (T dry 1/2) in minutes to the nearest minute standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute if the appliance is a condenser tumble dryer, the average condensation efficiency class - "condensation efficiency class X on a scale from G (least efficient) to A (most | Rated capacity in kg of cotton laundry for the standard cotton programme at full load | 8 |
| Electric Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Sas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load Automatic tumble dryer or Non automatic tumble dryer EU Ecolabel (If applicable) Energy consumption of the standard cotton programme at full and partial load The duration of the left-on mode (P o) and on the left-on mode (P I) for the standard Cotton programme to full load The duration of the left-on mode if the appliance is equipped with a power management system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & finche relates, that this programme is suitable for drying normal wet cotton lanudry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes at full load (T dry) and the programme at full and partial load in minutes are rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load | Air vented, condenser or gas fired | Condenser |
| per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh N/A Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh N/A Gas Only: The weighted Annual Energy Consumption - "Energy consumption "X" kWh N/A Automatic Automatic Cautomatic tumble dryer or Non automatic tumble dryer Automatic EU Ecolabel (If applicable) - Energy consumption of the standard cotton programme at full and partial load 0.5 W / 1.0 W Cotton programme at full load 0.5 W / 1.0 W The duration of the left-on mode (P I) for the standard 0.5 W / 1.0 W Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton haudry and that it is the most efficient programme in terms of energy consumption for cotton 'standard cotton programme is suitable for drying normal wet cotton haudry and that it is the most efficient programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at suitable or drying rougramme time of the standard cotton programme at minute as well as the programme time of the standard formy and that it is the most efficient programme time terms of energy consumption for cotton | Energy efficiency class | В |
| Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" Automatic Automatic tumble dryer or Non automatic tumble dryer Automatic EU Ecolabel (If applicable) - Energy consumption of the standard cotton programme at full and partial load 4.75 kWh / 2.53 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard 0.5 W / 1.0 W The duration of the left-on mode if the appliance is equipped with a power management 30 minutes system 30 minutes "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton "standard cotton programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme is suitable for drying normal wet cotton The weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute B The weighted programme tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" B If the ap | Electric Only : The weighted Annual Energy Consumption - "Energy consumption "X" kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" | 561 kWh |
| EU Ecolabel (If applicable) - Energy consumption of the standard cotton programme at full and partial load 4.75 kWh / 2.53 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard 0.5 W / 1.0 W Cotton programme at full load 30 minutes Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the which the information within the label & fiche relates, that this programme in terms of energy consumption for cotton "standard drying programme is suitable for drying normal wet cotton laundry and that it is the to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme is suitable for drying normal wet cotton laundry and that it is the standard torton programme is suitable for drying normal wet cotton laundry and that it is the standard torton programme is suitable for drying normal wet cotton laundry and that it is the standard cotton programme at full load (T dry 1/2) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute 107 mins (Tt) / 142 mins (Tdry) / 80 mins (Tdry1/2) If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class A on a scale from G (least efficient) to A (most efficient)" 85% If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial lo | Gas Only : The weighted Annual Energy Consumption - "Energy consumption "X" kWh Gas per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low -power modes. Actual energy consumption per cycle will depend on how the appliance is used" | N/A |
| Energy consumption of the standard cotton programme at full and partial load 4.75 kWh / 2.53 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard 0.5 W / 1.0 W and the duration of the left-on mode if the appliance is equipped with a power management 30 minutes system 30 minutes 4 full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme in terms of energy consumption for cotton 1 we weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute to the nearest minute as well as the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute as "condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" 166 dB(A) 100 minutes and cotton programme at full and partial load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full | Automatic tumble dryer or Non automatic tumble dryer | Automatic |
| Energy consumption of the standard cotton programme at full and partial load 4.75 kWh / 2.53 kWh Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard 0.5 W / 1.0 W and the duration of the left-on mode if the appliance is equipped with a power management 30 minutes system 30 minutes 4 full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme in terms of energy consumption for cotton 1 we weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute to the nearest minute as well as the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute as "condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" 166 dB(A) 100 minutes and cotton programme at full and partial load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full load "Noise Level (dB(A)) for the standard cotton programme at full | EU Ecolabel (If applicable) | - |
| Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load 0.5 W / 1.0 W The duration of the left-on mode if the appliance is equipped with a power management system 30 minutes Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton "standard drying programme is uitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton 107 mins (Tt) / 142 mins (Tdry) / 100 minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full and partial load (T dry 1/2) in minutes to the nearest minute 107 mins (Tt) / 142 mins (Tdry) / 100 mins (Tdry1/2) If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" 85% If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load" 85% Noise Level (dB(A)) for the standard cotton programme at full load 66 dB(A) | | 4 75 KM/b / 2 52 KM/b |
| cotton programme at full load 30 minutes The duration of the left-on mode if the appliance is equipped with a power management system 30 minutes Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the standard drying programme is suitable for drying normal wet cotton the information within the label & fiche relates, that this programme in terms of energy consumption for cotton "standard cotton programme is witable for drying normal wet cotton laundry and that it is the standard drying normal wet cotton The weighted programme time (T t) of the standard cotton programme at full and partial load is the standard cotton programme at well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute so the nearest minute B If the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class A on a scale from G (least efficient) to A (most efficient)" B If the appliance is a condenser tumble dryer, the average condensation efficiency class - "Some at full and partial load" Some at full and partial load Noise Level (dB(A)) for the standard cotton programme at full load Got deg(A) | | |
| system Indication that the "standard cotton programme" used at full and partial load is the standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton The weighted programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry) and the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" Noise Level (dB(A)) for the standard cotton programme at full load Noise Level (dB(A)) for the standard cotton programme at full load | Power consumption of the off-mode (P o) and on the left-on mode (P I) for the standard cotton programme at full load | 0.5 W / 1.0 W |
| standard drying programme to which the information within the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton the label & fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the suitable for drying normal wet cotton laundry and that it is the most efficient programme time (T t) of the standard cotton programme at full and partial load in minutes and rounded to the nearest minute as well as the programme time of the standard cotton programme at full load (T dry 1/2) in minutes to the nearest minute standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute the standard cotton programme at partial load (T dry 1/2) in minutes to the nearest minute lf the appliance is a condenser tumble dryer, the condensation efficiency class - "Condensation efficiency class X on a scale from G (least efficient) to A (most efficient)" If the appliance is a condenser tumble dryer, the average condensation efficiency class - "standard cotton programme at full and partial load" Noise Level (dB(A)) for the standard cotton programme at full load | The duration of the left-on mode if the appliance is equipped with a power management system | 30 minutes |
